# About us

Pool Agro specialises in the international marketing and export of agri–food specialties: pulses, specialty grains, dried fruits and nuts, and agricultural by–products for animal feed.

We operate from Rosario, Argentina, at the heart of the country's main agro–industrial hub on the Paraná River and the Paraguay–Paraná Waterway, one of the region's key logistics corridors. Together with GrupoSur Export we form an integrated structure that follows the product

from origin and processing through to marketing and delivery to international markets.

We work with importers, wholesale distributors, packers and food processors who need consistent quality, compliance with technical specifications and reliable logistics and commercial management.

### Consistent quality

Product selected for quality, origin and technical specifications.

### Reliability

Shipment commitments met on time and as agreed.

### Logistics and export service

Road freight to neighbouring countries and sea containers worldwide.

### Flexibility

Tailored to each customer's needs and specifications.
